**Or mail to: Tom Grow, 1060 Fort Pickens Road  
Pensacola Beach, FL 32561**

**For more information contact: Robin Zehr, Chairman 850-546-1371**

This Gulf Coast Workshop is a rare opportunity to spend uninterrupted time with internationally recognized ceramic artists Randy Johnston and Jan McKeachie Johnston. In this workshop Randy and Jan will be making pottery within traditional concepts, with a focus on the exchange of ideas involved in making pots related to function. Demonstrations will cover the use of the wheel and the construction of forms by altering pieces and by using slabs and paper patterns. In addition, we will share our thought process as we approach the objects we choose to make.

This will be an exciting workshop with lots of discussions about the work and relationship to contemporary ceramics. We will view images of historical and contemporary work in ceramics and also a personal slide lecture of time in Japan and Randy and Jan's own studio and kilns.

For those interested there will be an opening of the Anagama kiln and the historical Ralph Howard Phillips Groundhog kiln in Navarre on Saturday. Visit our website for more information and visit Jan and Randy's site at <http://www.mckeachiejohnstonstudios.com> to learn more about them and see their incredible work.
